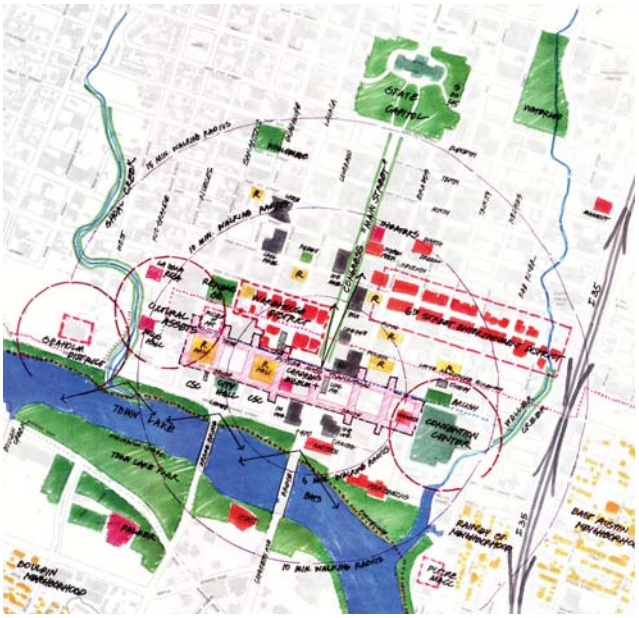
Austin 2nd Street District Streetscape


The City's vision for the redesign of the 2nd Street District is to enhance the identity and image of downtown Austin as a civic and cultural destination for residents, visitors and businesses while preserving and enlivening Austin's sense of place. When constructed, the reconfigured roadways and streetscape improvements will provide an appropriate, public-friendly setting, linking two civic destinations - the new City Hall and the Convention Center Complex - along what will become downtown's key shopping or "pedestrian-dominant" spine: 2nd Street. The project will also integrate the works of artists to impart a distinct Austin sense of place and cultural identity.
